SUBJECT INDEX

Acid rain, simulated
effects of drought stress and, on foliar conductance of *Zea mays* L. 79
Acidic precipitation
ozone, soil Mg, and, effects on growth and nutrition of loblolly pine seedlings..... 67
Accumulation of litter biomass
a model for the decomposition and..... 423
Accuracy, reference
in *Environmental and Experimental Botany* 379
Aeluropus lagopoides (L.) Trin.
differential waterlogging tolerance in three grasses of contrasting habitats: *Leptochloa fusca* (L.) Kunth., *Cynodon dactylon* (L.) Pers. and..... 437
Aging of wheat leaves
effect of u.v.–A n; and role of phytochrome..... 267
Air pollution, oxidant
leaf photosynthetic and water relations responses for "Valencia" orange trees exposed to 427
Allium roots
cyto-morphological alterations in, induced by surfactants 179
Aluminum treatments
the recovery of roots of *Zea mays* L. from; : towards elucidating the regulatory processes that underlie root growth control 153
Anabena PCC 7119
alteration of dinitrogen fixation and metabolism in cyanobacterium, by phosphamidon 479
Angelica archangelica
furanocoumarin concentrations in fruits and seeds of 447
Apical phyllogenesis, kinetics of
of the main stem of soybean (*Glycine max* (L.) Merr.): effects of stand density..... 59
Apios americana, waterlogged
oxygen insensitivity of photosynthesis by..... 117
Aranda orchid roots
relation of respiration to CO_2 fixation by, ... 327
Artificial u.v. radiation
effects of solar and, on motility and pigmentation in the marine *Cryptomonas maculata*..... 33
Banana fruits, peel of
the effect of gamma irradiation on the ultrastructure of..... 43
Behavior, of lateral roots
in winter wheat as affected by temperature 187
Bioenergetic homeostasis
effects of incident light intensity on the yield of steady-state chlorophyll fluorescence in intact leaves. An example of 23
Biomass, litter
a model for the accumulation and decomposition of 423
Bradyrhizobial strains
the effect of high temperature on *Vigna radiata* nodulation and growth with different 285
Cd
low molecular weight metal complexes in the freshwater moss *Rhynchostegium riparioides* exposed to elevated concentrations of Zn, Cu, Pb and, in the laboratory and field 359
Cells, mesophyll, ultrastructure of
influence of 1, 10-phenanthroline, a photodynamic herbicide, on the; and photosynthetic activity in greening pea seedlings..... 385
Cells, rose
a comparison of the effects of a fungal elicitor and ultraviolet radiation on ion transport and hydrogen peroxide synthesis by 209
Chlorophyll fluorescence, steady-state
effects of incidental light intensity on the yield of, in intact leaves: an example of bioenergetic homeostasis 23
Chloroplasts
involvement of sulfite and sulfate anions in the SO_2-induced inhibition of the oxygen-evolving enzyme Photosystem II in,: a review 11
Chromium, effect of
on activities of hydrolytic enzymes in germinating pea seeds 133
Climate, influence of
on the disposal of lichen soredia 239

Clone, diploid of *Tradescantia* KU 27
spontaneous, radiation- and EMS-induced somatic pink mutation frequencies in the stamen hairs and petals of a . 413
CO_2 fixation
relation of respiration to, by *Aranda* orchid roots 327
CO_2-induced
increases in net photosynthesis and concomitant reductions in stomatal conductance; a general relationship between 381
Cold desert shrubs and grasses
root profiles of, in disturbed and undisturbed soils..... 165
Compaction, soil
effects of, on the development of rice and maize root systems..... 333
Competitive interactions
between four foliose lichens on north and south facing rock surfaces..... 51
Complexes, metal
low molecular weight, in the freshwater moss *Rhynchostegium riparioides* exposed to elevated concentrations of Zn, Cu, Cd and Pb in the laboratory and field..... 359
Components, root system
response of the different, of sorghum to incidence of waterlogging 107
Concentrations, metal ion
in red spruce foliage over time..... 141
Conductance, foliar
effects of drought stress and simulated acidic rain on, of *Zea mays* L. 79
Conductance, stomatal
a general relationship between CO_2-induced increases in net photosynthesis and concomitant reductions in, ... 381
Conservation, Nature, Focus on (book review)
No. 24, *Radioactivity and Wildlife*, by V. H. Kennedy, A. D. Horrill and F. R. Livens. Reviewed by H. D. Maillie .. 253
Control, root growth
the recovery of the roots of *Zea mays* L. from various aluminum treatments: towards elucidating the regulatory processes that underlie 153
Cortex, root, structure of
and metabolic responses of *Spartina patens* to soil redox conditions 91
Cotton germplasm
genetic variation among, for water-use efficiency 453
genetic variation for root–shoot relationships among 461
Crown roots, seminal and
of wheat seedlings. Growth and development of, as affected by temperature 471
Cryptomonas maculata
effects of solar and artificial u.v. radiation on motility and pigmentation in the marine 33
Cu
low molecular weight metal complexes in the freshwater moss *Rhynchostegium riparioides* exposed to elevated concentrations of Zn, Cd, Pb and, in the laboratory and field 359
Cucumber (*Cucumis sativus* L.)
influence of vesicular–arbuscular mycorrhizal fungi (*Glomus* spp.) on the response of, to salt stress 313
influence of vesicular–arbuscular mycorrhizal fungi (*Glomus* spp.) on the response of cucumber ( ) to salt stress 313
Cultured shoot explants
plasticity of phenotypic expression in, of *Pinus caribaea* Morelet 405
Cyan obacterium *Anabena* PCC 7119
alteration of dinitrogen fixation and metabolism in, by phosphamidon 479
Cynodon dactylon (L.) Pers.
differential waterlogging tolerance in three grasses of contrasting habitats: *Aeluropus lagopoides* (L.) Trin., *Leptochloa fusca* (L.) Kunth., and 437
Cyto-morphological alterations
in *Allium* roots induced by surfactants 179
DDTC, influence of
on SO_2 effect on tomato seedling (*Lycopersicon esculentum* Mill.) photosynthesis 125
Decomposition of litter biomass
a model for the accumulation and 423
Density, stand, effects on
kinetics of apical phyllogenesis of the main stem of soybean (*Glycine max* (L.) Merr.) 59
Deterioration, sunflower seed
from exposure to u.v.-C radiation 201
Development, and growth
of seminal and crown shoots of wheat seedlings as affected by temperature 471
of sorghum roots after exposure to different periods of a hot root-zone temperature 397

Development, of rice and maize root systems
effects of soil compaction on the 333
Dinitrogen fixation
alteration of, and metabolism in cyanobacterium *Anabena* PCC 7119 by phosphamidon 479
Dispersal of lichen soredia
the influence of climate on the..... 239
Distribution, root
a review: radiotracer methods to determine 1
Disturbed soil
root profiles of selected cold desert shrubs and grasses in undisturbed and, ... 165
Drought stress
effects of simulated acidic rain and, on foliar conductance of *Zea mays* L. 79
Efficiency, water-use
genetic variation among cotton germplasm for..... 453
Effluents in water and sediment
responses of wetland plants to 351
Elemental composition, neutron activation analysis of
in a marine phanerogam *Posidonia oceanica* (L.) Delile; a biological indicator of pollution 255
Elicitor, fungal
a comparison of the effects of u.v. radiation and a, on ion transport and hydrogen peroxide synthesis by rose cells 209
Emission (of methane)
methane in flooded soil water and the, through rice plants to the atmosphere 343
EMS- and radiation-induced
and spontaneous somatic pink mutation frequencies in the stamen hairs and petals of a diploid clone of *Tradescantia* KU 27 413
Energy exchange
and leaf temperature behavior of three plant species 295
Enzymes, hydrolytic
effect of chromium on activities of, in germinating pea seeds 133
Exchange, energy
and leaf temperature behavior of three plant species 295
Explants, shoot
plasticity of phenotypic expression in cultured, of *Pinus caribaea* Morelet..... 405
Fixation, dinitrogen
alteration of, and metabolism in cyanobacterium *Anabena* PCC 7119 by phosphamidon 479
Flooded soil water
methane in, and the emission through rice plants to the atmosphere 343
Fluorescence, chlorophyll, yield of steady-state
effects of incident light intensity on the, in intact leaves. An example of bioenergetic homeostasis 23
Focus on Nature Conservation (book review)
No. 24, *Radioactivity and Wildlife*, by V. H. Kennedy, A. D. Horrill and F. R. Livens. Reviewed by H. D. Maillie .. 253
Foliage, red spruce
metal ion concentrations in, over time..... 141
Foliar conductance
effects of drought stress and simulated acidic rain on, of *Zea mays* L. 79
Foliose lichens
competitive interactions between four, on north and south facing rock surfaces..... 51
Freshwater moss (*Rhynchostegium riparioides*)
low molecular weight metal complexes in the, exposed to elevated concentrations of Zn, Cu, Cd and Pb in the laboratory and field 359
Fruits
and seeds of *Angelica archangelica*. Furanocoumarin concentrations in 447
Fungal elicitor
a comparison of the effects of ultraviolet radiation and a; on ion transport and hydrogen peroxide synthesis by rose cells 209
Furanocoumarin
concentrations in fruits and seeds of *Angelica archangelica* 447
Gamma, irradiations
germination et croissance pollinique *in vitro* du pollen de melon (*Cucumis melo* L.) aprés..... 277
Gamma radiation
the effect of, on the ultrastructure of the peel of banana fruits..... 43
Genetic variation
among cotton germplasm for water-use efficiency 453
for root–shoot relationships among cotton germplasms 461

for stress-related traits in guar 303
Germination and survival
soil metal effects on the, of *Quercus alba* L. and *Q. prinus* L. 145
Germination (pollen)
et croissance pollinique *in vitro* du pollen de melon (*Cucumis melo* L.) aprés irradiations gamma 277
Germination, seed
effects of temperature and oxygen on seedling growth and, in sunflower (*Helianthus annuus* L.) 193
Germplasm, cotton
genetic variation among, for water-use efficiency 453
genetic variation for root–shoot relationships among 461
Glycine max. (L.) Merr.
kinetics of apical phyllogenesis of the main stem of soybean ( ): effects of stand density 59
Grasses
root profiles of selected cold desert shrubs and, in disturbed and undisturbed soils 165
Grasses of contrasting habitats
Aeluropus lagopoides (L.) Trin., *Cynodon dactylon* (L.) Pers. and *Leptochloa fusca* (L.) Kunth. Differential waterlogging tolerance of 437
Growth and development
of seminal and crown roots of wheat seedlings as affected by temperature 471
of sorghum roots after exposure to different periods of a hot root-zone temperature 397
Growth, final
the effects of SO_2 on the, of *Medicago trunculata* 319
Growth, of loblolly pine seedlings
ozone, acidic precipitation and soil Mg effects on nutrition and, ... 67
Growth, of *Vigna radiata*
the effect of high temperature on nodulation and, with different bradyrhizobial strains 285
Growth, seedling
effects of temperature and oxygen on seed germination and, in sunflower (*Helianthus annuus* L.) 193
Guar
genetic variation for stress-related traits in 303
Hairs, stamen
spontaneous, radiation- and EMS-induced somatic pink mutation frequencies in the petals and, of a diploid clone of *Tradescantia*, KU 27 413
validity of simplified scoring methods of somatic mutations in, of *Tradescantia* 247
Helianthus annuus L. (sunflower)
effects of temperature and oxygen on seed germination and seedling growth in 193
Herbicide, photodynamic, a
influence of 1,10-phenanthroline; on the ultrastructure of mesophyll cells and photosynthetic activity in greening pea seedlings 385
Herbicides, toxicity of some
to *in vitro* growing tobacco pollen tubes (the pollen test) 217
Homeostasis, bioenergetic
effects of incident light intensity on the yield of steady-state chlorophyll fluorescence in intact leaves. An example of 23
Hydrogen peroxide synthesis
a comparison of the effect of a fungal elicitor and u.v. radiation on ion transport and, in rose cells 209
Hydrolytic enzymes, effect of chromium on
in germinating pea seeds 133
Indicator, biological, of pollution
neutron activation analysis of elemental composition in a marine phanerogam, *Posidonia oceanica* (L.) Delile: a 255
Influence of climate
on the dispersal of lichen soredia 239
Intensity, light
effects of incident, on the yield of steady-state chlorophyll fluorescence in intact leaves. An example of cellular homeostasis 23
Interactions, competitive
between four foliose lichens on north and south facing rock surfaces 51
In vitro growing tobacco pollen tubes
toxicity of some herbicides to, (the pollen test) 217
In vitro (pollen growth and germination)
germination et croissance pollinique *in vitro* du pollen de melon (*Cucumis melo* L.) aprés irradiations gamma 277
Ion, metal
concentrations of, in red spruce foliage over time 141
Ion transport
a comparison of the effects of a fungal elicitor and u.v. radiation on hydrogen peroxide synthesis and, by rose cells 209

Iron, localization of
and other elements in the lichen *Nephroma arcticum* (L.) Torss. 367
Irradiations gamma
germination et croissance pollinique *in vitro* du pollen de melon (*Cucumis melo* L.) aprés..... 277
Kinetics of apical phyllogenesis
of the main stem of soybean (*Glycine max* (L.) Merr.): effects of stand density..... 59
Lateral roots, winter wheat
behavior of, as affected by temperature 187
Leaf
photosynthetic and water relation responses for "Valencia" orange trees exposed to oxidant air pollution 427
Leaf temperature behavior
energy exchange and, of three plant species..... 295
Leaves, intact; steady-state chlorophyll fluorescence in
effects of incident light intensity on the yield of. An example of bioenergetic homeostasis 23
Leaves, wheat
effect of u.v.-A on aging of, and role of phytochrome..... 267
Leptochloa fusca (L.) Kunth.
differential waterlogging tolerance in three grasses of contrasting habitat: *Aeluropus lagopoides* (L.) Trin., *Cynodon dactylon* (L.) Pers., and..... 437
Lichen *Nephroma arcticum* (L.) Torss.
localization of iron and other elements in the 367
Lichen (*Ramalina menziesii* Tayl.)
physiological responses of the, to the Los Angeles urban environment 229
Lichen soredia, dispersal of
the influence of climate on the,..... 239
Lichens
interactions between sulfur dioxide and nitrate in some 223
Lichens, foliose
competitive interactions between four, on north and south facing rock surfaces..... 51
Light intensity, effects of incident
on the yield of steady-state chlorophyll fluorescence in intact leaves. An example of bioenergetic homeostasis..... 23
Litter biomass
a model for the accumulation and decomposition of 423
Loblolly pine seedlings
ozone, acidic precipitation, and soil Mg effects on growth and nutrition of..... 67
Localization of iron
and other elements in the lichen *Nephroma arcticum* (L.) Torss. 367
Los Angeles urban environment
physiological responses of the lichen *Ramalina menziesii* Tayl. to the 229
Lycopersicon esculentum Mill.
influence of DDTC on SO_2 effect on tomato seedling ( ) photosynthesis 117
Maize
effects of soil compaction on the development of rice and, root systems..... 333
Maize, spectral properties of
as related to soil oxidation–reduction condition 99
Medicago trunculata
the effects of SO_2 on the final growth of 319
Mesophyll cells, ultrastructure of
influence of 1, 10-phenanthroline, a photodynamic herbicide, on the ; and phososynthetic activity in greening pea seedlings..... 385
Metabolic responses
of *Spartina patens* to soil redox conditions; root cortex structure and..... 91
Metabolism, dinitrogen fixation and
alteration of, in cyanobacterium *Anabena* PCC 7119 by phosphamidon 479
Metal complexes
low molecular weight, in the freshwater moss *Rhynchostegium riparioides* exposed to elevated concentrations of Zn, Cu, Cd and Pb in the laboratory and field..... 359
Metal ion concentrations
in red spruce foliage over time..... 141
Metal, soil
effects on the germination and survival of *Quercus alba* L. and *Q. prinus* L. 145
Methane
in flooded soil water and the emission through rice plants to the atmosphere 313

Methods, radiotracer
to determine root distribution. A review 1
Methods, scoring
validity of simplified, of somatic mutations in *Tradescantia* stamen hairs 247
Mg, soil
ozone, acidic precipitation, and, effects on growth and nutrition of loblolly pine seedlings 67
Model, a
for the accumulation and decomposition of litter biomass 423
Moss, freshwater
low molecular weight metal complexes in the, *Rhynchostegium riparioides* exposed to elevated concentrations of Zn, Cu, Cd and Pb in the laboratory and field 359
Motility
effects of solar and artificial u.v. radiation on pigmentation and, in the marine *Cryptomonas maculata* 33
Mutation frequencies, somatic pink
spontaneous, radiation- and EMS-induced, in the stamen hairs and petals of a diploid clone of *Tradescantia*, KU 27 413
Mutations, somatic
in *Tradescantia* stamen hairs; validity of simplified scoring methods of 247
Mycorrhizal fungi (*Glomus* spp.)
influence of vesicular–arbuscular, on the response of cucumber (*Cucumis sativus* L.) to salt stress 313

the recovery of the roots of *Zea mays* L. from various aluminum treatments: towards elucidating these 153
Relationship, general
between CO_2-induced increases in net photosynthesis and concomitant reductions in stomatal conductance 381
Respiration, relation of, to CO_2 fixation
by *Aranda* orchid roots 327
Response, to incidence of waterlogging
of the different components of the root system of sorghum 107
Responses, metabolic
root cortex structure and, of *Spartina patens* to soil redox conditions..... 91
Responses, physiological
of the lichen *Ramalina menziesii* Tayl. to the Los Angeles urban environment 229
Rhynchostegium riparioides
low molecular weight metal complexes in the freshwater moss ( ) exposed to elevated concentrations of Zn, Cu, Cd and Pb in the laboratory and field..... 359
Rice
effects of soil compaction on the development of maize and, root systems 333
Rock surfaces, north and south facing
competitive interactions between four foliose lichens on, ... 51
Root cortex structure
and metabolic responses of *Spartina patens* to soil redox conditions 91
Root distribution
a review: radiotracer methods to determine 1
Root growth control
the recovery of the roots of *Zea mays* L. from various aluminum treatments: towards elucidating the regulatory processes that underlie, ... 153
Root profiles
of selected desert shrubs and grasses in disturbed and undisturbed soils 165
Root–shoot relationships
among cotton germplasm. Genetic variation for..... 461
Root system components
response of the different, of sorghum to incidence of waterlogging 107
Root systems, development of
effects of soil compaction on, of rice and maize 333
Root-zone temperature, hot
growth and development of sorghum roots after exposure to different periods of a 397
Roots, *Allium*
cyto-morphological alterations in, induced by surfactants 179
Roots, lateral
behavior of, in winter wheat as affected by temperature..... 187
Roots, of *Zea mays* L.
the recovery of, from various aluminum treatments: towards elucidating the regulatory processes that underlie root growth control 153
Roots, orchid
relation of respiration to CO_2 fixation by *Aranda* 327

Roots, seminal and crown
of wheat seedlings. Growth and development of, as affected by temperature 471
Roots, sorghum
growth and development of, after exposure to different periods of a hot root-zone temperature..... 397
Rose cells
a comparison of the effects of a fungal elicitor and u.v. radiation on ion transport and hydrogen peroxide synthesis by 209
Salt stress
influence of vesicular–arbuscular mycorrhizal fungi (*Glomus* spp.) on the response of cucumber (*Cucumis sativus* L.) to 313
Scoring methods, simplified
of somatic mutations in *Tradescantia* stamen hairs; validity of 247
Seed germination
effects of temperature and oxygen on seedling growth and, in sunflower (*Helianthus annuus* L.) 193
Seed, sunflower, deterioration of
from exposure to u.v.-C radiation 201
Seeds
and fruits of *Angelica archangelica*. Furanocoumarin concentrations in,..... 447
Seeds, pea
effect of chromium on activities of hydrolytic enzymes in germinating..... 133
Sediment and water, effluents in
responses of wetland plants to 351
Seedling growth
effects of temperature and oxygen on seed germination and, in sunflower (*Helianthus annuus* L.) 193
Seedling, tomato
influence of DDTC on SO_2 effect on, , (*Lycopersicon esculentum* Mill.) photosynthesis..... 117
Seedlings, pea, greening
influence of 1,10-phenanthroline, a photodynamic herbicide, on the ultrastructure of mesophyll cells and photosynthesis activity in, ... 385
Seedlings, wheat
growth and development of seminal and crown roots of, as affected by temperature 471
Seminal and crown roots
of wheat seedlings. Growth and development of, as affected by temperature 471
Shoot explants, cultured
plasticity of phenotypic expression in, of *Pinus caribaea* Morelet 405
Shrubs
root profiles of selected cold desert grasses and, in disturbed and undisturbed soils 165
SO_2
the effects of, on the final growth of *Medicago trunculata* 319
SO_2 effect, influence of DDTC on,
tomato seedlings (*Lycopersicon esculentum* Mill.) photosynthesis..... 117
SO_2-induced inhibition
involvement of sulfite and sulfate anions in the, of the oxygen evolving enzyme Photosystem II in chloroplasts: a review 11
Soil compaction, effects of
on the development of rice and maize root systems..... 333
Soil metal effects
on the germination and survival of *Quercus alba* L. and *Q. prinus* L. 145
Soil Mg
ozone, acidic precipitation and, effects on growth and nutrition of loblolly pine seedlings 67
Soil oxidation–reduction condition
spectral properties of maize as related to 99
Soil redox conditions
root cortex structure and metabolic responses of *Spartina patens* to 91
Soils, disturbed and undisturbed
root profiles of selected cold desert shrubs and grasses in 165
Soil water, flooded
methane in, and the emission through rice plants to the atmosphere 343
Solar u.v. radiation
effects of artificial and, on motility and pigmentation in the marine *Cryptomonas maculata* 33
Somatic mutations
in *Tradescantia* stamen hairs; validity of simplified scoring methods..... 247
Somatic pink mutation frequency
spontaneous, radiation- and EMS-induced, in the stamen hairs and petals of a diploid clone of *Tradescantia*, KU 27 413
Soredia, lichen
the influence of climate on the dispersal of..... 289

Sorghum
response of the different root system components of, to incidence of waterlogging 107
Sorghum roots
growth and development of, after exposure to different periods of a hot root-zone temperature 397
Soybean, main stem of
kinetics of apical phyllogenesis of the, (*Glycine max* (L.) Merr.): effects of stand density 59
Spartina patens
root cortex structure and metabolic responses of, to soil redox conditions 91
Spectral properties of maize
as related to soil oxidation–reduction condition 99
Spruce, red
metal ion concentrations in foliage of, over time 141
Stamen hairs
spontaneous, radiation- and EMS-induced somatic pink mutation frequencies in the petals and, of a diploid clone of *Tradescantia*, KU 27 413
Stamen hairs, *Tradescantia*
validity of simplified scoring methods of somatic mutations in 247
Stand density, effect of
kinetics of apical phyllogenesis of the main stem of soybean (*Glycine max* (L.) Merr.): 59
Steady-state chlorophyll fluorescence
effects of incident light intensity on the yield of, in intact leaves. An example of bioenergetic homeostasis 23
Stem, main, of soybean
kinetics of apical phyllogenesis of the, (*Glycine max* (L.) Merr.): effects of stand density 59
Stomatal conductance
a general relationship between CO_2-induced increases in net photosynthesis and concomitant reductions in, ... 381
Stress, drought
effects of simulated acidic rain and, on foliar conductance of *Zea mays* L. 79
Stress-related traits
genetic variation for, in guar 303
Stress, salt
influence of vesicular–arbuscular mycorrhizal fungi (*Glomus* spp.) on the response of cucumber (*Cucumis sativus* L.) to 313
Sulfate
involvement of sulfite and, anions in the SO_2-induced inhibition of the oxygen evolving enzyme Photosystem II in chloroplasts: a review 11
Sulfur dioxide
interaction between nitrate and, in some lichens 223
Sulfite
involvement of, and sulfate anions in the SO_2-induced inhibition of the oxygen evolving enzyme Photosystem II in chloroplasts: a review 11
Sunflower (*Helianthus annuus* L.)
effects of temperature and oxygen on seed germination and seedling growth in, ... 193
Sunflower seed deterioration
from exposure to u.v.-C radiation 201
Surfactants
cyto-morphological alterations in *Allium* roots induced by 179
Survival
soil metal effects on the germination and, of *Quercus alba* L. and *Q. prinus* L. 145
Synthesis, hydrogen peroxide
a comparison of the effects of a fungal elicitor and ultraviolet radiation on ion transport and, by rose cells 209
Temperature
behavior of lateral roots of winter wheat as affected by 187
growth and development of seminal and crown roots of wheat seedlings as affected by 471
Temperature and oxygen, effects of
on seed germination and seedling growth in sunflower (*Helianthus annuus* L.) 193
Temperature behavior, leaf
energy exchange and, of three plant species 295
Temperature, high, effect of
on *Vigna radiata* nodulation and growth with different bradyrhizobial strains 285
Temperature, root-zone, hot
growth and development of sorghum roots after exposure to different periods of a, ... 397
Tobacco pollen tubes, *in vitro* growing
toxicity of some herbicides to, (the pollen test) 217

Tolerance, waterlogging, differential
in three grasses of contrasting habitats: *Aeluropus lagopoides* (L.) Trin., *Cynodon dactylon* (L.) Pers., and *Leptochloa fusca* (L.) Kunth. 437
Tomato seedling photosynthesis
influence of DDTC on SO_2 effect on, (*Lycopersicon esculentum* Mill.) 117
Toxicity
of some herbicides to *in vitro* growing tobacco pollen tubes (the pollen test) 217
Tradescantia, KU 27
spontaneous, radiation- and EMS-induced somatic pink mutation frequencies in the stamen hairs and petals of a diploid clone of, ... 413
Tradescantia stamen hairs
validity of simplified scoring methods of somatic mutations in..... 247
Traits, stress-related
genetic variation for, in guar 303
Transport, ion
a comparison of the effects of a fungal elicitor and u.v. radiation on hydrogen peroxide synthesis and, by rose cells 209
Trees, "Valencia" orange
leaf photosynthetic and water relations responses for, exposed to oxidant air pollution..... 427
Undisturbed soils
root profiles of selected cold desert shrubs and grasses in disturbed and, ... 165
Ultrastructure
of the peel of banana fruits. The effect of gamma irradition on the 43
Ultrastructure of mesophyll cells
influence of 1,10-phenanthroline, a photodynamic herbicide, on the; and photosynthetic activity in green pea seedlings..... 385
Ultraviolet (u.v.) radiation
a comparison of the effects of a fungal elicitor and, on ion transport and hydrogen peroxide synthesis by rose cells 209
Urban environment, Los Angeles
physiological response of the lichen *Ramalina menziesii* Tayl. to the..... 229
U.v.-A, effect of
on aging of wheat leaves and role of phytochrome..... 267
U.v.-C radiation
sunflower seed deterioration from exposure to 201
U.v. radiation, solar and artificial
effects of, on motility and pigmentation in the marine *Cryptomonas maculata*..... 33
"Valencia" orange trees
leaf photosynthetic and water relations responses for, exposed to oxidant air pollution..... 427
Variation, genetic
among cotton germplasm for water-use efficiency 453
Variation, genetic
for root–shoot relationships among cotton germplasm 461
Variation, genetic
for stress-related traits in guar 303
Vigna radiata
the effect of high temperature on, nodulation and growth with different bradyrhizobial strains 285
Vesicular–arbuscular mycorrhizal fungi (*Glomus* spp.)
influence, on the responses of cucumber (*Cucumis sativus* L.) to salt stress..... 313
Water and sediment, effluents in
responses of wetland plants to 351
Water, flooded soil
methane in, and the emission through rice plants to the atmosphere 343
Waterlogged *Apios americana*
oxygen insensitivity of photosynthesis by..... 117
Waterlogging, incidence of
response of the different root system components of sorghum to..... 107
Waterlogging, tolerance, differential
in three grasses of contrasting habitats: *Aeluropus lagopoides* (L.) Trin., *Cynodon dactylon* (L.) Pers., and *Leptochloa fusca* (L.) Kunth. 437
Water relations
leaf photosynthetic and, responses for "Valencia" orange trees exposed to oxidant air pollution 427
Water-use efficiency
genetic variation among cotton germplasm for, ... 453
Wetland plants
responses of, to effluents in water and sediment 351

Wheat leaves
effect of u.v.-A on aging of, and role of phytochrome 267
Wheat seedlings
growth and development of seminal and crown roots of, as affected by temperature 471
Wheat, winter
behavior of lateral roots in, as affected by temperature 187
Wildlife, Radioactivity and (book review)
Focus on Conservation, Vol. 24, by V. H. Kennedy, A. D. Horrill and F. R. Livens. Reviewed by H. D. Maillie 253
Winter wheat
behavior of lateral roots in, as affected by temperature 187
Yield, of steady-state chlorophyll fluorescence
effects of incident light intensity on the, in intact leaves. An example of bioenergetic homeostasis 23
Zea mays L.
effects of drought stress and simulated acidic rain on foliar conductance of 79
the recovery of, from various aluminum treatments: towards elucidating the regulatory processes that underlie root growth control 153
Zn
low molecular weight metal complexes in the freshwater moss *Rhynchostegium riparioides* exposed to elevated concentrations of Cu, Cd, Pb and , in the laboratory and field 359

PRINTED IN GREAT BRITAIN AT BPCC-AUP ABERDEEN LTD.
